👤 PROFILE

I am a self-taught Front-End developer started 4 years ago. I have knowledge in layout with HTML5, CSS (Grid, Flexbox, Sass Bootstrap, Tailwind). Webpack management for task automation. I have JavaScript ES6 knowledge as well as JQuery knowledge. I have made personal projects with these technologies that I keep in my Github repositories. I also have experience in developing Wordpress websites.

I have knowledge in VueJS and ReactJS, I am currently learning Next JS and Gatsby.

📁 EMPLOYMENT HISTORY

Front-End Developer at Leadbox HQ, Canadá 2020 — Present

I am currently working in the Core Team developing new features, I am also in charge of improving the Core Web Vitals of each of the sites so that they have a good performance. I use SEO tools such as Ahrefs to check the status of the sites and make the corresponding corrections. I also take care of the development of new sites and the creation of Google Analytics accounts and customized Data Studio reports.

Front-End Developer at Fundación EPyCA, Argentina 2020 — 2020

I was in charge of converting some old Flash views into HTML and CSS and fixing some bugs in the Reprasis system, a platform of the foundation, so that it could work properly before the start of the course at the University of Buenos Aires (UBA).

🎓 EDUCATION

Bachelor of Computer Science applied to Multimedia and Website Design, Universidad Nacional del Litoral, Argentina 2020 — 2023

Platzi 2018 — 2022
